Importance: High

Rick

Attached are three section 18 emergency exemption requests for your approval from MD, PA, and VA for use of bifenthrin on apple, peach, and nectarine to control the brown marmorated stink bug, and other supporting documents. Since this is year 9 for these exemptions, it needs to be signed by the OD. Also please be aware that we expect additional section 18 submissions for NC, NJ, NY, WV and likely DE will be forthcoming.

In addition, as you may have noticed earlier today Alex pointed out the FR Notice announcing the receipt of requests for use of Dinotefuran in VA, MD and PA for the same uses and pest. For background, the additional requirement of an FR notice is required when we have 5+ years of section 18 requests with no associated section 3 submission under evaluation. For bifenthrin, we have a section 3 pending; therefore we do not need to do the FR Notice. For dinotefuran, the section 18 request requires a notice in the FR because there is not a pending section 3 action under review in OPP. FYI - a while back we suggested that IR-4 wait on submitting an action for these uses since there is the ongoing noenicitinoid review going on.

Hi Mike, Dan,

Attached are the final documents associated with the section 18 emergency exemption requests from MD, PA, and VA for use of bifenthrin on apple, peach, and nectarine to control the brown marmorated stink bug.

This will be the ninth year for these requests; therefore, please route to Rick for his further concurrence and approval after you have had a chance to review and sign the document. This is a time-sensitive request, so please let me or Tawanda know if you have any concerns.

FYI- We expect additional section 18 submissions for NC, NJ, NY, WV and likely DE will be forthcoming. I have attached the 2012 memo associated with these series of requests for further information.

Thank you,

Laura

Laura –

Please find attached the final documents for the section 18 emergency exemption requests from MD, PA, and VA for use of bifenthrin on apple, peach, and nectarine to control the brown marmorated stink bug.

If everything looks OK please forward through the management chain to Rick Keigwin for signature.
